On-Page SEO Results

Your On-Page SEO could be better

Your page has some level of On-Page SEO optimization but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

Title Tag

You have a title tag, but ideally it should be shortened to between 10 and 70 characters (including spaces).

Himagiri Hospitals - Best Multispecialty Hospital In Hyderabad - Gachibowli

Length : 75

Title tags are very important for search engines to correctly understand and categorize your content.

Meta Description Tag

Your page appears to be missing a meta description tag.

A meta description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

On-Page Link Structure

We found 74 total links. 15% of your links are external links and are sending authority to other sites. 1% of your links are nofollow links, meaning authority is not being passed to those destination pages.

Friendly Links

Your link URLs appear friendly (easily human or search engine readable).

Usability

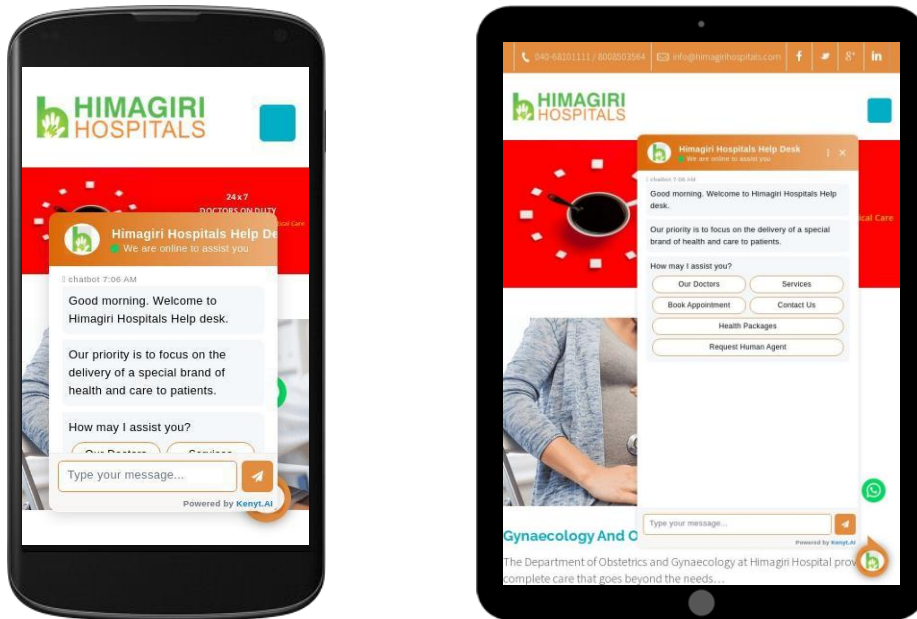

Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

Your page has failed Google's Core Web Vitals assessment.

Core Web Vitals are UI metrics created by Google that measure page experience and are becoming increasingly important as a ranking factor.

Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

Your page appears to be using iFrames.

iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines.

Favicon

Your page has specified a favicon.

Email Privacy

Email addresses have been found in plain text.

We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.

Legible Font Sizes

There is some text on your page that is small and may not be legible enough for particular users.

We recommend reviewing all text on your page in different devices to ensure that it is of appropriate size.

Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

Performance Results

Your performance needs improvement

Your page's performance has various issues that may be adversely affecting users. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Page Speed Info

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.

Server Response

All Page Content Loaded

All Page Scripts Complete

Download Page Size

Your page's le size is quite large which, regardless of other optimizations, can reduce load speed and impact user experience.

A general rule is to keep your page under 5MB in total le size.

This check displays the total number of les that need to be retrieved from web servers to load your page.

Google Accelerated Mobile Pages (AMP)

This page does not appear to have AMP Enabled.

JavaScript Errors

Your page is not reporting any JavaScript errors.

HTTP2 Usage

Your website is using the recommended HTTP/2+ protocol.

Optimize Images

Your page appears to include images which are poorly optimized.

Properly formatting and compressing images can have a significant impact on page load performance.

Minification

Some of your JavaScript or CSS files do not appear to be minified.

Minification is a reasonably simple way to reduce page size, and subsequently load time.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

Your page appears to be using inline styles.

Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Social Results

Your social could be better

You do not appear to have a strong social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page for visibility, and work to build a following on those networks.

Facebook Connected

Your page has a link to a Facebook Page.

Facebook Open Graph Tags

We have not found Facebook Open Graph Tags on your page.

Facebook Open Graph Tags are a type of structured data that can be placed on your page to control what content is shown when a page is shared on Facebook.
